The allies are said to be putting teeth in the league of nations. But if they do the blameworthy thing may chew itself up.

IS SIMPLY SURPRISING

It is surprising what you can save by careful buying. People are fast getting out of the habit of ordering goods without as much as asking the price. They now investigate not only the merchandise, but the prices and having cash to spend they spend it where the dollar has the greatest buying power. We are always pleased to have you investigate our meats and groceries and to compare prices with what others are charging.

GOOD WETHERS AND YEARLINGS ARE LACKING.

Pigs and Thin Hogs Suitable For Feeding Steady At Between Twelve and Fourteen Dollars—Receipts of Cattle From New Mexico, Colorado and Texas Running Quite Large.

Correspondence The Sun.

KANSAS CITY, Mo., Oct. 11.—The rally in cattle prices late last week attracted increased receipts today, and prices turned down again except for the strictly choice wintered and fed steers. Omaha and Chicago had a large supply of northwest grass cattle. Hog prices were lower than late last week, though receipts were moderate for the season of the year. Improved demand was reported in the sheep division and prices for lambs were twenty-five cents higher. Receipts today were 27,000 cattle, 7500 hogs and 8500 sheep. Good to choice grassfat heavy wintered and fed steers held steady today, but they were in moderate supply. The bulk of the offerings fat enough for kill was plain to fair grass steers that sold fifteen to twenty-five cents lower or still slightly above the low point last week. Receipts from Texas, New Mexico and Colorado were the largest of the season. At the decade killers bought more freely than a week ago. A good many lightweight grass steers, common quality, went at \$7.00 to \$8.25. The better grades brought \$9.00 to \$11.50. Cows and heifers were down twenty-five cents. Veal calves were twenty-five to fifty cents lower. A good many country buyers were here and prices held steady. The bulk of the demand was for steers with some showing of quality. Common lightweight stockers were hard to move. Demand for thin cattle is not as large as the feed situation justified.

Hog prices were irregular today, though the average was steady to ten cents lower. Opening prices were ten cents lower and on the close most sales were steady. Packers were active and took the bulk of the supply at \$14.25 to \$15.15. Hogs with weight are being regarded more favorably and within a few weeks weighty ones will command a premium. The top price today was \$15.25. Pigs and thin hogs suitable for feeding were steady at \$12.50 to \$14.25.

Prices for lambs were twenty-five cents higher and some sheep sold fifty cents above bids on the extreme low close late last week. Native lambs sold up to \$11.75 and western ones \$12.00. Ewes \$4.00 to \$5.25. Wethers and yearlings were lacking. Demand for feeding lambs was active at strong to twenty-five cents higher prices. Fair to good thin lambs \$10.50 to \$11.25 and choice grades up to \$11.75.

Prices for lambs were twenty-five cents higher and some sheep sold fifty cents above bids on the extreme low close late last week. Native lambs sold up to \$11.75 and western ones \$12.00. Hogs—Receipts, 4500 head. Steady, but mostly strong to fifteen cents higher than yesterday's average; some up more; top, \$15.25; bulk, medium and heavy, \$14.75 to \$15.25; good and choice hogs, \$14.45 to \$14.95.

Sheep—Receipts, 1000 head. Sheep and native lambs are strong; western ones, \$15.15; native lambs, \$12.50; western lambs, \$10.00 to \$12.00; choice hogs, \$14.45 to \$14.95.

ing September 14th amounted to 1,440,746 full carcases, the weight of which was 49,539,144 pounds and that one steamship, the Horatia, arriving in New York on September 27th, had a cargo of frozen lamb from New Zealand, numbering 194,876 carcases with an average weight of thirty-five pounds, making the total weight of the cargo 6,820,900 pounds. Such is a recent statement of M. M. Justin of the federal bureau of crop estimates for Utah.

"Speaking of lamb and mutton," Justin further says: "I might say that the wool consumption report for last August, just received shows the quantities of wool entering into manufacture in the United States was 11,638,365 pounds of domestic and 21,811,501 pounds of foreign wool, a total of 33,449,866, compared to 48,938,476 pounds in August, last year; that the largest quantity used in any one state was in Massachusetts and the smallest in the Pacific Coast States; 241,170 pounds. The August schedules regarding wool were sent to five hundred and thirty-three manufacturing concerns, of which ninety-seven reported no wool consumed."

GREATER THAN LAST YEAR

Most All the Crops of the State Showing Up Well.

According to M. M. Justin, statistician for this state for the United States department of agriculture, Utah will produce this year five million eight hundred and forty-four thousand bushels of wheat or 26 percent more than last year. The report is made up on October 1st. Spring wheat this year yielded about twenty-four bushels an acre with fourteen bushels last year. This increase is greater than that shown by winter wheat, due to a larger proportion of the crop growing under irrigation. Less than 10 percent of winter wheat is irrigated while over 73 percent of spring wheat is artificially watered. The irrigated portion of the spring wheat crop probably will not average more than ten bushels per acre, as much of it was a total failure.

Oats will probably average forty-two bushels the acre. This crop is 87 percent irrigated, so was not as much affected by the unfavorable effect of the weather on the dry land portion. The dry land barley was badly injured. All grain crops show up better than last year because there was little lack of irrigation water this season, while last season serious shortage was rather general.

Apples promise a very fair crop of excellent quality. Picking was just beginning the first of the month. Beans are yielding better than average, but the average is still becoming smaller. Tomatoes yielded well. The average is smaller than usual, so that production has slumped somewhat below last year. Cabbages show an excellent yield, nine tons per acre, but the average, never very large, is reported less than usual. Onions are reported averaging two hundred and twenty bushels to the acre with an average 9 per cent less than usual. Grapes are yielding exceptionally well and quality seems good. Peas proved better than expected.

Potatoes show little change the past month, the high expectations of the early season being seemingly well grounded. The production in the state is estimated as 2,240,000 bushels or 136 per cent of last year. Sugar beets also made satisfactory progress the past month. The total output will be the heaviest ever produced as the acreage is very largely increased and growth has been very good.

Clover seed continues very promising with a condition at harvest of 98 per cent. Alfalfa seed yield is estimated as 4.9 bushels per acre compared with 4.5 bushels last year. This was interpreted as meaning twelve thousand acres with a production of fifty-four thousand bushels of seed last year, and the same interpretation now indicates 15,000 acres and 77,400 bushels of seed. As little threshing has been done, this estimate is purely preliminary.

Pastures and ranges are very good over most of the state and late alfalfa growth is producing a considerable amount of feed. Some will make a light fourth cutting.

Ervin Wimbler, recently hurt in a mine accident at Boreas, has closed a deal for the P. C. Miller ranch over near Castle Dale. He will quit mining.

Mayor McGraw, L. R. Nutter and Sheriff Keltner left yesterday afternoon for the hills above Huntsville to be on hand at the opening of the deer season today.

Mrs. Clondo Morley was given a shower Monday evening at the home of her mother, Mrs. C. H. Harris, there being some twenty-five of Mrs. Morley's lady friends present. She was the recipient of many useful and valuable presents.

In the waters around New York there has been a shrinkage of some 30 percent in state owned oyster beds.

Deceit By Mabey Is Charged
By Secretary of State
In Open LetterHALT! COMMANDS BENNION, AS HE REFUTES
CHARGES OF REPUBLICAN CANDIDATE
FOR GOVERNORHon. Chas. H. Mabey,
Dear Sir:

Reports show that in your campaign speeches you are charging the present state administration with gross extravagance—with multiplying offices, and with moving generally toward financial disaster. But, if they will make you governor you will stop the waste, reduce the offices, ease the burdens of the people, and all will be well. Now, Mr. Mabey, as one in touch with state affairs, and as one disposed to help save you from the errors of what you charge and what you promise, I would call your attention to certain facts. You are reported as saying that forty-eight new boards or commissions have been created (and, by inference, imposed upon the taxpayer) during the present four-year term of Governor Bamberger. As against this statement it appears that the actual number of new boards of commissioners on the payroll of the state, and now functioning, and which have been created by the present state administration, are (5) five only. So in this you are about one-tenth right and about nine-tenths wrong. Well, a little worse than that, from the fact that these five new boards or commissions replaced five existing boards or departments, and therefore ADDED NOTHING, numerically, to the list of state functionaries. They are as follows:

New Boards.
The Industrial Commission.
The Public Utilities Commission.
The Securities Commission.
The State Live Stock Board.
Inspector of Apiaries.

Replaced Boards Or Departments.
Bureau of Immigration and Statistics.
Coal Mine Inspector.
Board of Labor Conciliation and Arbitration.
State Live Stock Inspector.
Board of Sheep Commissioners.

Now, Mr. Mabey, as to your promises: Which of these new boards would you abolish or which would you combine? Would you do away with the industrial commission and blot out what has proved to be one of the greatest pieces of constructive and protective legislation since statehood? Would you eliminate the securities (blue sky) commission and turn loose every wildcat vender who may have headed this way? And, by the way, this commission operates without a cent of cost to the taxpayer. Would you abolish the utilities commission, which by a single act has saved many times its cost? Would you do away with the live stock board, which operates with a nominal cost and does the work formerly done by a group of departments? Would you abolish the office of inspector of apiaries, with its record of monetary saving to the state of not less than ten times its cost?

In short, just WHAT DO YOU PROPOSE will accomplish such a saving as you infer you would make? Then, as to your charge of threatened bankruptcy: In this connection you are reported as saying that the state is being bankrupted by the present
